SKILLS

Programming & Web

C#, JavaScript, C++, MVC Frameworks, OOP, SOLID, Clean Code

Unity & Mobile Stack

Unity 3D & 2D, Android/iOS Development, UGUI & UI Toolkit, Coroutines & Async, URP

Integration & Architecture

Back-end Data Integration, SOAP / REST APIs, Agile Methodologies, Software Architecture

Design & UX

UX Principles, Adobe Creative Suite (Familiar), UI Systems, FTUE, Rapid Prototyping

Tools & Secondary

Git, Unreal Engine 5, Plastic SCM, Visual Studio, GitHub Copilot

EDUCATION

Master of Computer Applications

RV College of Engineering, Bangalore
Sep 2022 – Sep 2024 · CGPA 8.83

B.Sc. Mathematics

The University of Burdwan, WB
Jul 2019 – Aug 2022 · CGPA 8.89

CERTIFICATION

Soft Skills & Personality

NPTEL

SUMMARY

Results-driven Unity Developer with 2 years of professional experience engineering **30+ Android/iOS software solutions**. Demonstrated expertise in C#, JavaScript, and Agile methodologies, successfully driving products from concept to deployment. Adept at MVC architecture, back-end data integration, applying UX principles, and cross-functional collaboration. Committed to writing well-designed, efficient code utilizing the latest software development practices.

EXPERIENCE

Unity Developer

Feb 2025 – Present

Zaplogics Solution · Remote

- Engineered **30+ Android/iOS products**, independently directing software solutions and rapid validation phases in a fast-paced Agile environment.
- Architected highly reusable software systems utilizing MVC frameworks and component-based architectures, collaborating with teams to determine scalable design.
- Integrated data from various back-end services and external databases, ensuring seamless data flow and robust user profiles across live projects.
- Orchestrated the design of scalable UI architectures by applying strong UX principles, significantly improving user onboarding and engagement metrics.
- Wrote well-designed, efficient code and spearheaded profiling initiatives, achieving a stable 60 FPS baseline on low-end Android/iOS hardware.

AR/VR Developer Intern

Aug 2023 – Dec 2023

Samsung Prism · Bangalore

- Programmed a multi-user VR simulation featuring real-time avatar synchronization, dynamically integrating data across concurrent user sessions.
- Applied core UX principles to iterate on interactive spatial interfaces and player comfort mechanics, consistently delivering well-designed code on schedule.

Salesforce Support / Release Intern

Feb 2024 – Jul 2024

Volvo Car · Bangalore

- Streamlined enterprise release workflows using Agile tracking, delivering a 15% increase in deployment efficiency for cross-functional teams.

PROJECTS

Capture The Flag (Unreal Engine 5, C++, Networking) — Multiplayer Software

Architected a networked multiplayer system integrating client-server synchronization, dynamic session hosting, and robust back-end data states, ensuring 100% replication accuracy and secure data flow.

TicTacTale (Unity 6, C#, JavaScript integration) — Software App

Engineered a scalable N×N grid architecture incorporating dynamic win detection. Applied advanced UX principles and responsive feedback via DOTween to elevate overall user engagement and retention.

Modular Inventory Engine (Unity, C#, MVC) — Architecture Prototype

Constructed a highly reusable MVC software framework across 12 decoupled classes, integrating robust data models with UI-separated views to eliminate monolithic dependencies and improve codebase maintainability.
